Water Treatment Plant Operator 1

Prerequisite: None

The 4-week course 82 clock hours / 6.0 credit units introduce water treatment plant operations in accordance with the Safe Drinking Water Act (SDWA). Special emphasis is given to implementation of the Surface Water Treatment Rule through USEPA approved filtration technology. Subject matter includes major provisions of the SDWA and its amendments; basic water chemistry; source water assessment; conventional treatment processes; treated water stability; waterborne diseases; public health protection; and an introduction to math skills equivalent to those required of State of California Grade I and II water treatment plant operators. This class is helpful to those preparing for the Grade I and Grade II state examination.

Water Distribution System Operator 1

Prerequisite: Water Treatment Plant Operator 1

This 4-week course 82 clock hours / 6.0 credit units provides an introduction to the principles of pressure pipe systems and the hydraulics involved in their operation. Design, installation, operation, and maintenance of basic elements of water systems including pipes, pumps, valves, meters, and related hydraulic units. Operations and maintenance safety considerations emphasized. Prepares students for the California Department of Health Services Grade 1 and 2 and qualifies you to take Grade 2 examination.

Waste Water System Operator 1

Prerequisite: Water Distribution Sys. Operator 1

This 4-week course 82 clock hours / 6.0 credit units provides intermediate and advanced instruction in the field of water production, types of reservoirs, water lines, pumps, valves, and related appurtenances. Studies design, proper operation, and facilities repair of a public waste water system. Also provides instruction in methods of record keeping and administrative responsibilities related to water systems. This course prepares students for the California Department of Health Services, Waste Water Operator certification exams at levels D-3, D-4, and D-5.

Prerequisites
